Modification delivery contracts 2012-12

Issued rectifications

March 2018

Two rectifications have been added to the English edition of SSG General Conditions 90-12. *Approval Day* and *Taking-over Day* have been mixed up in two paragraphs, being obviously not correct. It has been taken care of. The new text has a thing underline boarder and the old incorrect wording has been marked with strikeover. Clause 1.11. Insurances - take out Insurance until Taking-over Day (not Acceptance Day) and in clause 11.2 Approval Day is when the Plant is being Approved (not on Taking-over Day). The modified edition will be distributed upon request in mid March 2018. The footer in the revised conditions reads: "2012-12 Europe edition, rel 2015-10/2018-03".

A new feature is in the SSG General Conditions (English and Swedish), you can now add text, tables, bullet lists, mark with colours, and similar. A significant improvement.

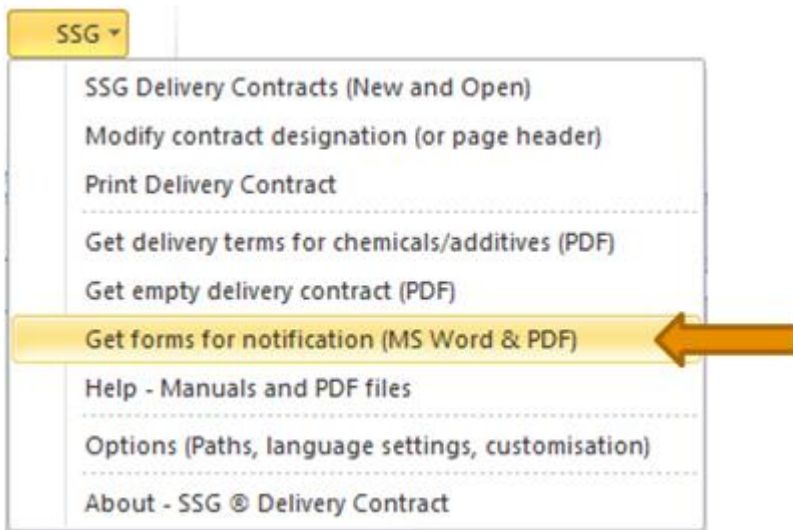

October 2015

Minor but functional rectifications have been implemented. Contact us to see what's included. The changes do not have any impact on the parties' actual negotiations, hence not issuing a revision only an update.

All subscribers will towards the end of October 2015 receive information and a possibility to receive the updated files. Any one receiving new files starting in October will in the footer of the concerned documents see that they have been modified. It states, "Europe edition 2012-12, rel 2015-10". Only five of the English contract documents/files have been rectified and three of the Swedish together with the Finnish, Polish and German files. Any adjustments done can be accessed by contacting us..

September 2013

If you are missing the text next (MS Word files) next to the arrow in the picture, you have an old issue from us. Please contact us.

Please notify us if your SSG menu in MS Word does not have the options above.

The latest addition is the option to open up forms in MS Word for notification for instance to report completion of erection or start of test-run. At the same time, we adjusted the checklist to allow for more than 1 page of, opened up all text fields in the checklist for unlimited amount of text. The same limitations have been removed from the documentation appendix as well as the SSG General Conditions.
