

SSG ACCESS STANDARD

MORE EFFICIENT ACCESS AND SKILLS CONTROL FOR INDUSTRY

SSG ACCESS STANDARD is a service for access and skills control for industry. It is included as standard in all levels of the SSG ENTRE concept and makes it easy for you to check that your contractors are compliant with the demands you specify for carrying out work at the plant. This service also facilitates site entry using the SSG ACCESS card, which can be used as a passcard.

SSG ACCESS STANDARD allows you, in your capacity as a plant, to query the SSG database directly and check that your access requirements are met. If necessary, responses can be displayed on a site security monitor, for instance. It is also possible to integrate course information with an existing entry system and open a gate for automatic entry. All SSG ACCESS cards come with technology which allows them to work in the most common entry systems on the market.

HOW IT WORKS

When a contractor arrives at your plant and uses his SSG ACCESS card in the reader, the SSG database is queried to find out which authorisation is required. An immediate response is then provided which indicates whether the courses required for access to your plant have been completed, such as SSG ENTRE BASIC COURSE, SSG SAFETY TICKET or SSG ENVIRONMENTAL TICKET. SSG ACCESS is linked to the MY SSG portal – where information on courses is administered and stored – and the SSG ACCESS application.

ADVANTAGES OF SSG ACCESS STANDARD

For industrial plants:

- Rapid checking of compliance with access requirements
- Simplified administration of passcards and less need to issue your own passcards.
- Can be accessed online.

For contractors

- Work can begin more quickly.
- Easy to show authorisations that can be organised in advance for a plant requiring SSG qualifications.
- ACCESS CARDS can be used at a number of plants in Sweden.

MORE INFORMATION

- The basic service for the SSG ENTRE concept includes SSG ACCESS STANDARD and no software installation is required – the service can be accessed via the online application.
- An integration solution permits checks to be carried out using SSG ACCESS cards even at unmanned entrances.
